Junior React Native Developer

If you want your work to have a positive impact on the lives of others, this is the job for you. At Vaultt, we're passionate about helping patients and caregivers dealing with chronic health conditions, and we want to help them securely manage their health journey. This is your opportunity to be part of an exciting health-tech start-up using cutting edge technology - helping to propel change and transforming the way things are done.

We are looking for a self-motivated and scrappy developer who thrives in a dynamic start-up environment and who is ready to dig into user problems and build out powerful solutions.

The role will be mostly front end, with the ability to flex your back-end muscles from time to time. You'll work with a small but dynamic team, getting in on the ground floor of a fast-growing Startup that's addressing a massive need in healthcare. You will have ownership over your technology decisions and your work will be meaningful and have a major impact.

As a Junior React Native Developer at Vaultt reporting to our Lead Engineer, you will build applications that are used by patients, caregivers and providers across Android, iOS, and Web. Our platform provides a full suite of tools that the patient or family caregiver can rely on. Our goal is to create a secure, elegant, native-feeling experience for all our users.

Minimum Qualifications (no exceptions):
- Must be a post-secondary graduate.
- Must be a Canadian citizen, permanent resident of Canada or person granted refugee status in Canada with a SIN number.
- Must be 15 to 30 years old.
- Must have some experience coding in React Native.

Roles and Responsibilities
- Participate in weekly sprints.
- Write maintainable, scalable, testable code across our codebases.
- Document and maintain new and existing code.
- Be empowered to identify opportunities and suggest changes.

The successful candidate will possess the following skills:
- Experience with React Native is a must.
- Experience with React and Node.js
- Experience estimating timelines and determining acceptance criteria.
- Ability to write well-documented, clean JavaScript code.
- Experience working with third-party dependencies and debugging dependency conflicts
- Familiarity with native build tools, like XCode, Gradle and Android Studio

- Understanding of REST APIs, the document request model, and offline storage
- Proficient understanding of code versioning tools, Git, etc.
- Experience with Jira, Bitbucket
- Experience with converting design files into reusable, testable React Native components that work across multiple devices.

Other role details:
- Start Date: Immediate
- Full-time permanent position
- Salary: $65,000 - $75,000
- Comprehensive health benefits.
- Remote work available
- Toronto employees have the option to work out of the swanky DMZ Incubator in downtown Toronto (with unlimited coffee & snacks)
- Paid vacation and days off

About Vaultt: Vaultt is a platform that helps families and caregivers store, organize, and share important information easily and securely. Vaultt's easy-to-use mobile app enables real-time and on-demand access to critical personal health information, documentation, schedules, calendars, and tasks that can be shared between family members, caregivers, and trusted professionals.

Inclusion: We are committed to diversity and inclusion. We encourage applications from all qualified candidates and will accommodate applicant's needs throughout the recruitment process. If you have accommodation needs, please reach out to us.

Contact: We can't wait to hear from you! Interested candidates please email resumé and cover letter to careers@vaultt.com
